

Your Association needs your help, NOW!

Everyone in this association has a responsibility to do everything they can to help fight legislation that could damage our industry. *Every* licensed broker, carrier rep and customer service reps have a responsibility to do everything they can to help fight legislation that could damage our industry. We are at war and 90% of our members are not helping us with the fight. We need more support, and we need it right now.

Yes, buying a raffle ticket at the luncheon or participating in a 50/50 raffle helps, but what we really need is a serious commitment. We are asking you to make a monthly commitment or one-time annual commitment towards the PAC. Just straight up, we need you, all of you, to get involved right now or it may just be too late.

California will pass some type of Health Care reform legislation by the end of the session, and we will be victims if we do not stand up as a group and say, "Listen to us. We know what we are doing. We are experts in this field, and we have answers to this problem."

Making a contribution is not easy but it is simple. Go to www.cahupac.org. Make a commitment, then drop me an email at chuck@cahupac.org and tell me you are "*in.*" I will send you a nice surprise for all new contributors and anyone who increases their contribution in the month of August.

We simply cannot wait until legislation is passed. It will just be too late. We need to be in the trenches right now getting on committees and supporting our lobbyists. Your contributions make all of this possible.

Unfortunately, in the end, if negative legislation is passed, I suspect we will then wake up this association, but it will simply be too late. **I am calling on all members and licensed benefit professionals to go right now to our website and make a monthly or one-time commitment and then call one person and ask them to do the same.**
