

### **September 2009 - One Minute Message**

The CAHU PAC is preparing for what we may need to do after the National Health Care debate is completed by asking you to consider participation in the CAHU PAC. Once the debate leaves Washington it will turn to the states to interpret and execute the program it has passed in Congress. It is believed that the State will have some authority over this plan and we will be right back in the middle of this. While we do not know what the final outcome will be, you can trust that we will need funds to lobby our position to conserve the role of the agent. I urge you to please see me (or the flyer on the table) and simply contribute \$20 per month to our PAC to help build our war chest that is to be used to lobby our state legislators to keep the role of the agent in the fore front of their minds. \$20 per month is all we ask. We all believe that the Agent delivery system is needed and that we provide a unique service to our clients. \$20 per month helps us communicate this message. Thank you.
